CNA Sidewalk Philosophy
January 2010

"The Cherrywood Neighborhood stands by its commitment to safe, walkable streets. The Cherrywood Neighborhood favors the establishment and maintenance of sidewalks along commercial corridors, and within internal corridors to the extent necessary to establish safe connectivity to perimeter destinations and to enhance safety and quality of life. There should be a sidewalk within two blocks of every residence to provide access to the entire sidewalk system. Internal sidewalks, when warranted, should generally be on only one side of the street"
